

My name is Leah and I'm reaching out on behalf of the YMCA of Central Florida. We have a free swim-safety program available to children ages 4-12 and their families to prepare them to be safe around the water this summer.

We would love to spread this news to families in the Seminole County elementary and middle schools.

Just in time for National Drowning Prevention month, the Y is offering free swim-safety activities all month long. And at the end of the month, select YMCA locations will provide free swimming lessons.

More information about the month-long activities can be found at <http://ymcaof.org/drowning-prevention>.

More information about the free swimming lessons can be found at <http://ymcaof.org/safety-around-water>.

Do you have recommendations on who I can reach out to who can share this information with teachers and parents?

Thank you,

Leah Santiago&Barr
